SUMMARY:

Computer Science Engineer graduate with analytical skills. Knowledge in Java, Python programming, with hands-on expertise in system analysis, decision-making processes, and technology applications for improved processes through academic projects. Experienced in team works with expertise in using technology to address operational issues in organizations

PROFESSIONAL SKILLS:

Analytical & Problem-Solving Skills:

Strong ability to analyze problems, evaluate systems, and propose efficient, data-backed solutions..

Data & System Analysis:

Skilled in understanding workflows, identifying process gaps, and improving system efficiency through structured analysis.

Soft Skills:

Effective communication, teamwork, adaptability, time management, and quick learning ability.

Programming & Technical Skills:

Proficient in Java and Python with a solid understanding of logic building, OOP concepts, and basic data structures.

Tools & Technologies:

Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Postman, MongoDB (basic), HTML, CSS, UI, UX, Figma.

PROJECTS:

Academic Project – Food Ordering & Process Optimization System

College Mini Project

- Analyzed user requirements and existing workflow to identify gaps in placing and processing of orders.
- Applied analytical skills to enhance navigation and interaction capabilities on various devices.
- Contributed in a team effort regarding the assessment of system functionalities and proposed improvements for processes, thus enabling enhanced efficiency.

Academic Project – Plant Analysis Tool

Academic Project

- Identified and researched system requirements and user needs in order to support data interpretation involving plant analysis.
 - Contributed to the design of an interface that would facilitate an easy data visualization process.
 - Enhanced overall usability through the simplification of layouts and workflow processes via analytical analysis.
-

EDUCATION:

Bachelor of Technology – Computer Science Engineering

Dr. Babasaheb Ambedkar Technological University, Lonere

CGPA: 7.2

Expected Graduation: July 2026
